Axion LITE is the budget version of Axion SQUARE. LITE is a compact inflatable tent of high quality and durability without horizontal beams. The inflatable structure itself comes in 3 sizes and 3 basic colours, while the roof and the sidewalls are available in 8 different stock colours. Visors, connecting tunnels and other accessories are also available.

Brand managers will surely appreciate the possibility of using different branded roofs with one structure, easily changeable by the zip-off technology. The zip-off cover, walls and visors can be printed in full colour dye sublimation upon demand.

CONCEPT

AXION Lite is the most popular member of the AXION family. All of the features of the AXION development like the central tube connector, the zip-off roof, and its availability in 4 sizes, makes it one of the most reliable inflatable tents on the market.

Axion SQUARE is the most popular member of the Axion family. All of the features of the Axion development like the horizontal stabilization beams, the central tube connector, the zip-off roof and its availability in 4 sizes make it one of the most reliable inflatable tents on the market. Axion SQUARE is proven to withstand winds up to 100 km/h, ranking the Axion products as one of the safest inflatable tents on the market.

Brand managers will surely appreciate the possibility of using different branded roofs with one structure, easily changeable by the zip-off technology. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full colour dye sublimation upon demand.

Axion HEXA is the newest member of the Axion family. This inflatable tent comes in a hexagonal base shape and two different sizes that provide a large area of either 38 or 56 sqm. It is the perfect solution for events where a rectangular base is required and the "neck" of the connection tunnel between two separate tents would cause difficulties. You can add walls to all sides or add tunnels to other tents of the same or different shape and size. All six openings can be equipped with a visor to extend the area covered even further. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full colour dye sublimation upon demand.

Based on the traditional 6-sided inflatable dome concept, SPIDER is a combination of hexagonal shape dome and a unique AXION air sealed structure system. SPIDER provides all advantages of LITE and SQUARE models, but offers bigger space with similar wind resistance. Additionally, it is the only SPIDER on the market available with inflatable extending visors. All of this without the necessity for permanent power supply!

SPIDER is ideal for any type of events offering contemporary and unique design. It offers a floor space of 42m² up to 66m². Available in a range of sizes and options including zip-off walls, optional visors and branding.

SPIDER is made of strong, but lightweight polyester fabric with contoured legs. Using our AXION smart inflation system, it requires no more than 2 people to set up and will take less than 20 minutes to assemble. The entire dome packs down into a compact carry bag that fits into any standard sized car, making it perfect for any road show or promotional event.

Axion TRIPOD is a new symmetrical triangle structure, which is an upgrade of our previous SHELL model. It is a great concept for both indoor and outdoor events as a podium cover, promotional stand cover, catering area cover or for anyone else just as a stylish sun shade.

Enjoy its innovative shape and airy design!

Thanks to the negatively sloped sidewalls, the efficient usage area is much larger. There is no need to use visors, as the internal space is unaffected by rain or sun. Axion TRIPOD is available in four sizes covering from 25sqm to 58sqm.

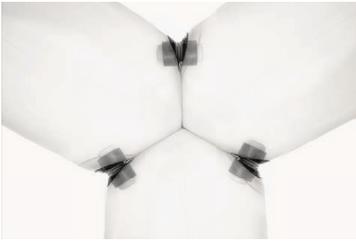

As with our other inflatable structures, handling is very easy. The TRIPOD is packed into a trolley bag and is easily transportable. Just one person can transport and inflate it within minutes.

The zip-off cover, walls and visors can be printed in full colour dye sublimation with unlimited design upon demand.

SMART INFLATION SYSTEM
 Patent pending one way central inflation system provides the luxury of one point inflation with perfect control of inflation chamber to chamber. It also provides easy detection of any air leaks. Smart inflation system is now included in each TRIPOD tent.

CASTED COMPONENTS
 New AXION aluminium casted components provide a unique look to each tripod tent. The TRIPOD roof is tensioned using an innovative pulley system.

FABRIC
 Fastex 500D FR rated polyester, UV stable, waterproof and water repellent fabric is used for all Lite tents.

ZIP-OFF ROOF
 Stay within your budget and get more than one roof for the inflatable structure. The simple zip-off system will allow you to change your roof anytime.

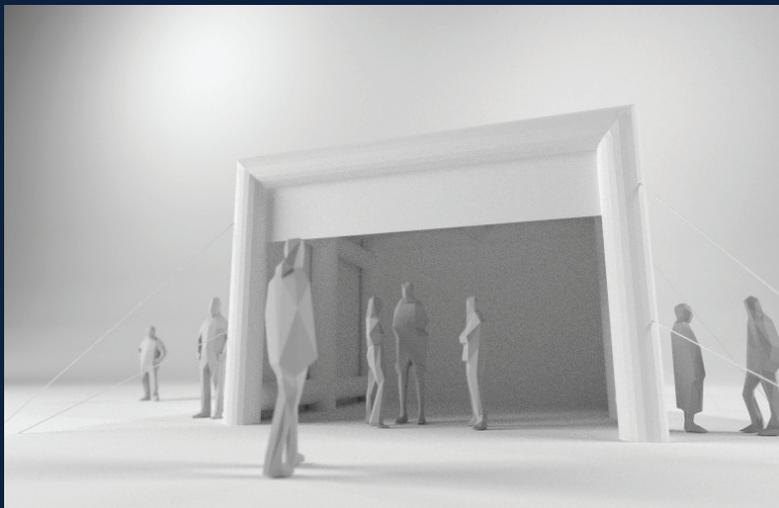

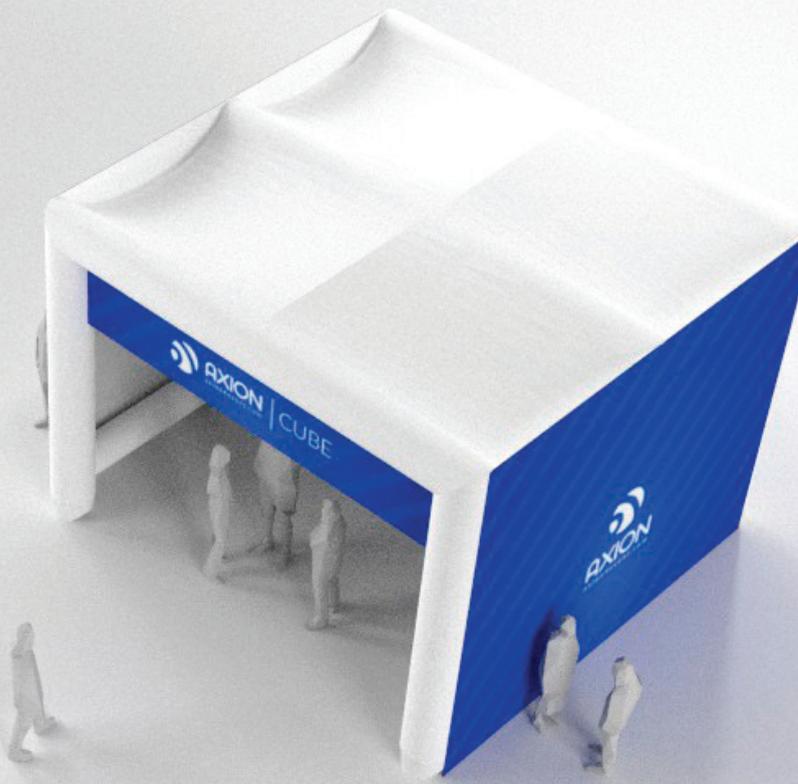

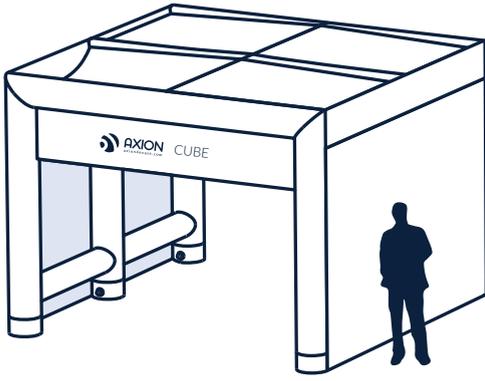

CENTRAL CONNECTOR
 Enjoy the same central connector system as used with other AXION models. It gives the user the possibility of easy on-site servicing.

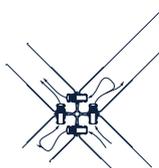

SUBLIMATION PRINT
 We use the newest technology for dye sublimation printing, as well as automatic cutting and welding.

MODULARITY

CONCEPT

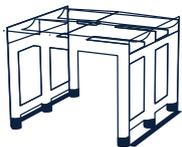

AXION|CUBE is a solution for all those, fed up with traditional inflatable or pop up tents. It is a new pneumatic tent model designed in a modern cubist style. Thanks to a unique solution of hidden water drain, a roof can stay optically flat. As with all AXION products, there is no necessity of permanent power supply!

Axion SHELL is a new model recently added to the Axion family. It comes in a triangular base shape that facilitates easy use for promotional events, or as a perfect modular "corner" part of the SQUARE or LITE composition. You can add walls to all sides or add tunnels to connect to other tents of the same or different size. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full colour dye sublimation upon demand.

Unique design of Axion FLOWER inspired by nature is bringing new emotions to the conservative world of event stands. It is different in all aspects, offering contemporary asymmetric shape and always fresh air inside.

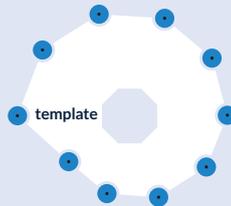

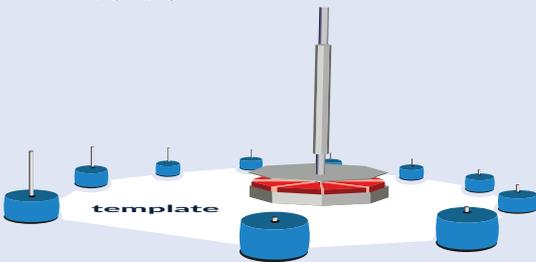

Any FLOWER structure is transportable in a van. Depending on its size, team of 3 to 6 people can completely assemble it within 3 to 5 hours, depending on terrain and personal experience.

The FLOWER is a combination of three materials. The shape of petals is guaranteed by patented system of high pressure air-sealed pneumatic tubes, inflated to nominal pressure of 2,0 bar (10x more as standard pneumatic structures). The tension of petal membranes is achieved by using FR certified high-tech BEDOUINFLEX PU stretch membrane. The weight of the whole structure is provided by steel components in central pole and perimeter plates in combination with water ballast bags.

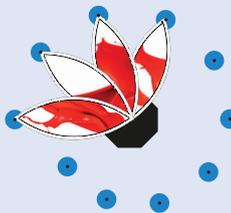

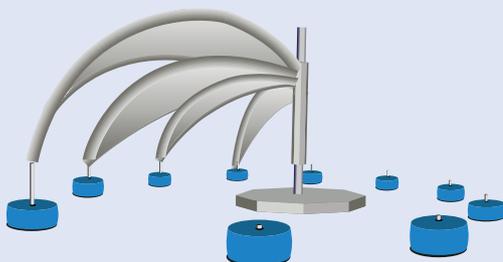

FLOWER is certified according to Eurocode norm for winds up to 100 km/h. In case of thunderstorm or strong wind, the sleeve of the central pole can be retracted down to decrease the total height of the whole structure by 1,3m. Water eventually going to the centre of the structure is drained through central gutter.

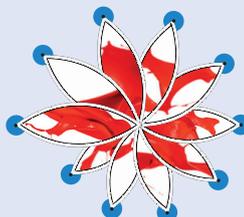

HOW IT WORKS

Define the space of the FLOWER by using ground template. Install retractable central pole and perimeter stands. Perimeter stands can be fixed to the ground, or weighted by using water ballast bags (weight from 170kg per stand). There are triangle water ballast bags included in a base platform of central pole too.

Pre-inflate all petals, zip on the artwork (in case of banner version) and hang on petals one by one to the central pole. Starting with the biggest one, retract central pole by installation of other petals one by one. Inflate each petal to the full pressure after its installation.

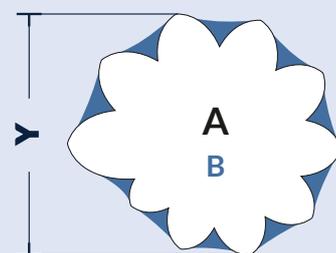

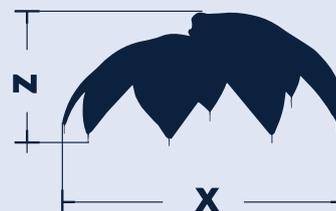

By installation of smallest petal the FLOWER is ready for immediate use. There is an option to use a central water gutter, as well as, triangle shades around the perimeter.

Enjoy a FLOWER, the new AXION stand concept!

INSTANT POP-UP SHELTERS

INFLATABLE STRUCTURES

Inflatable Event Furniture (Air-sealed structures)

EVENT DESK SOLITAIRE

Event Desk "SOLITAIRE" is an excellent product for POP/POS campaigns. It includes an easily transportable bag that is 120x46x12cm in size and weighs only 13kg. One person can inflate the two tubes in 5 minutes resulting in a great desk with a solid top and bottom. Inflatable tubes are air sealed, and a permanent fan is not needed after inflation. Inflatable Event Desks offer the flexibility to place two shelves in between the inflatable tubes, as well as adding a white or RGB light to illuminate it from the inside. The entire surface area of the desk can be printed in full dye sublimation upon demand.

There are two models available - Straight (DSS) or Curved (DSB). Just choose one that fits your needs!

DSB

	Internal shelves	
Scope of standard delivery	Desk including internal inflatable tubes and outside cover, transport bag, hand pump, repair kit	

EVENT DESK MODULAR

Event Desk "MODULAR" is an excellent product for POS campaigns where a larger desk area is needed. Easily transportable segments can be attached together by Velcro to create different shapes and sizes. One person can inflate two tubes of one segment within 5 minutes; total assembly time depends on the number of segments. One skilled person would be able to assemble a round desk with 6 segments and a front banner within 15 minutes. The result is a great desk with a solid top and bottom that can be easily transported in a car. The inflatable tubes are air sealed, and a permanent fan is not needed after inflation. Inflatable Event Desks offer the possibility to place two shelves in between the inflatable tubes, or adding a white or coloured light to illuminate it from the inside. The changeable front cover can be printed in full colour dye sublimation upon demand.

DMS

There are three models available - Straight (DMS), Curved (DSA) or Round (DSR). Just choose one that fits your needs!

Event "BONGO" Table helps at POP campaigns, as well as at small catering events. When folded, it is only a disc of 80cm diameter and 12cm width. Weight of the bag is 14kg. BONGO Table works on an easy principle - inflatable piston is stretching fabric between two solid circles. Just after a minute of inflating you will get a perfect promotion or catering table. Inflatable tube is air sealed, no permanent fan is needed after inflation. BONGO Tables offer the possibility of placing white or RGB light inside. The whole table's top surface can be printed in full color dye sublimation upon demand.

There are two models available, each offering different height - 110cm in height (TSR) or 72cm in height (TSR-L).

Most regular sets of solid table and chairs will not easily fit into a standard size vehicle. If you are organizing a fair or small event and need even more seating, our Inflatable Event Seats can solve your problem easily.

You can choose from 3 different types – C-shaped seat (PSC), U-shaped seat (PSU) or individual seat (PSI). PSC or PSU are "donut" type seats designed to offer seating for several people, and also to be paired with tables. PSC has been designed to work well with round fiberglass stackable table and offers comfortable seating for up to 4 people. PSU, available in 3 sizes, has been designed to be paired with our FLEXI Pop-Up Table, offering seating for up to 7 people. PSI is a comfortable individual seat for 1 person, offering a patented combination of air and polystyrol for cushioning. As an alternative, our all our seats may be used efficiently with TSR-L BONGO Tables. All seats can be printed in full colour dye sublimation upon demand and tables can be branded with a sticker.

Pneu Seat	PSC	PSU	PSI

INFLATABLE STRUCTURES

Inflatable Advertising
(Air-sealed structures)

Inflatable Advertising Objects are inflatable, air-sealed objects suitable for events and promotion. Silent, durable and fully printable, these products include a transport bag implemented in a base. It doesn't take more than 10 minutes to set up and break down. Usually they are customized with your company's logo or artwork. Thanks to higher operational pressure Advertising Objects are able to resist extreme weather conditions, therefore these objects are the first choice for skiing and extreme sports, as well as car racing and other events where one must be sure that an electrical blackout will not cause an emergency situation.

INFLATABLE TUBES

Advertising TUBE is the easiest, but most popular type of our advertising products. It is an air sealed inflatable cylinder available in a combination of 4 sizes and 5 diameters, from 250x38cm up to 500x96cm, fully dye sublimation printed. It is possible to be by using different "socks" per one base by simple zip-off system.

When used in combination with a metal ballast plate, this is the most stable inflatable column on the market!

INFLATABLE BLOCKS

The TPU bladder inside Advertising BLOCK is flat shaped with minimum radius corners, so the "sock" fits perfectly without unnecessary seams and waves. This air sealed product is available in 3 sizes, from 250cm up to 400cm, fully dye sublimation printed. It is possible to be by using different "socks" per one base by simple zip-off system.

When used in combination with a metal ballast plate, this is the most stable inflatable column on the market!

INFLATABLE WALLS

Advertising WALL is a new sealed inflatable product on the market - suitable for indoor and outdoor use too. Using a "drop stitch fabric" technology with high pressure inside, after proper anchoring it will withstand same wind as heavy duty solid wall with the advantage of safety due to the fact, that this wall is inflatable. There is also a possibility to install LED lights to the top edge of the wall. It is available in 7 sizes, with fully dye sublimation printed "sock" or banners.

It is possible to use different "socks" per one wall, also the banners may be replaced with Velcro stripes (specially for big outdoor units).

This product is perfectly suitable for all kinds of advertising or sport events, as billboard, sponsor wall or photo-shooting wall.

INFLATABLE HALF ARCHES & ZIP OFF ARCHES

HALF ARCH is a section of standard Inflatable ARCH. Even though inflatable arches are independent on electric power and therefore much less risky for event organizers, there are some events where half-arches are obliged. due to safety reasons. For such events HALF ARCH is the safest and least risky inflatable ARCH available on the market!

For those organizing outdoor events, races or competitions, podiums for winners use to be a nightmare. Our patent pending, easily transportable solution is ready to help. Each set consists of 3 inflatable objects and a hand pump. All our podiums can be internally illuminated with RGB Lights. When packed, height of each part is 7 - 15 cm (15cm in case when internal light is installed). Inflation time is around 5 minutes.

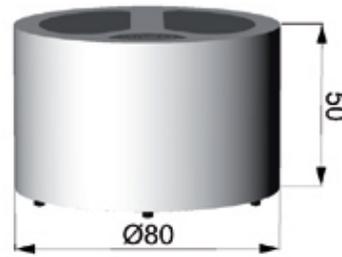

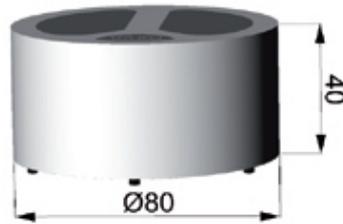

MATERIALS:

- MDF Plates
- TPU bladder tubes
- PVC Top & Bottom
- PVC or Polyester Cover

TYPE OF PRINTING:

Full Dye Sublimation
